

SIZE GUIDE

CIVI 3AXIS

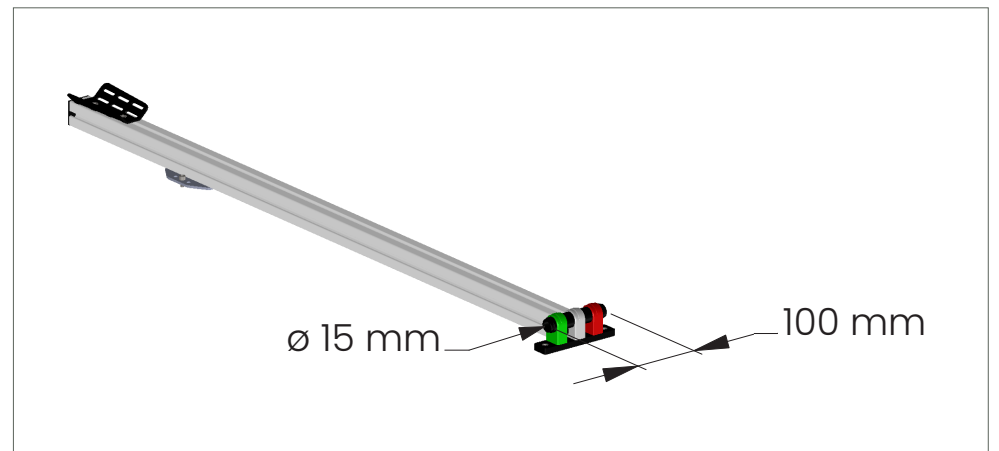

1. FRONT THROUGH PIN SIZE

A - \varnothing 15x110 mm

B - \varnothing 15x100 mm

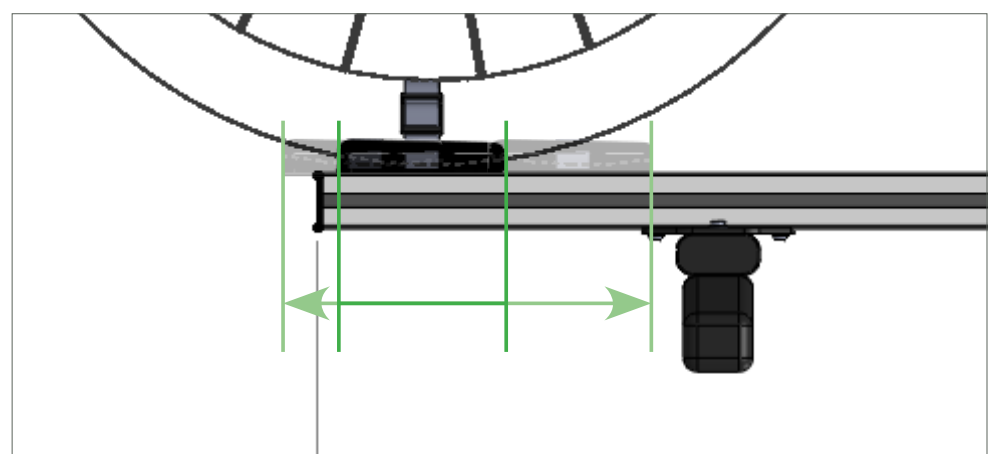

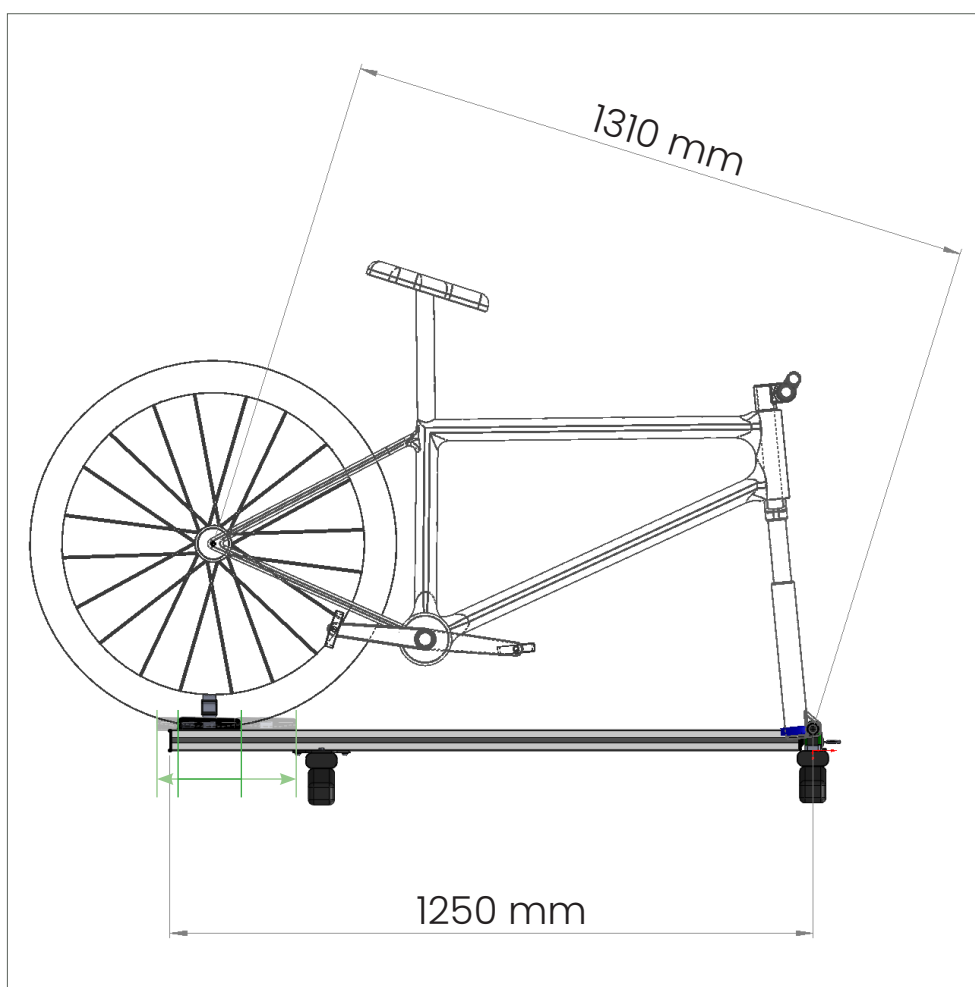

During purchase it is mandatory to select the correct size between A - \varnothing 15x110 mm / B - \varnothing 15x100 mm

To check the measurements of the bicycle pivot it is necessary to remove the front wheel and measure the diameter of the pivot. The front through axle can be 15 mm or, in the case of downhill bikes, 20 mm. After that you need to measure the distance between the milled inner faces of the fork (where the wheel hub is located), which can be 110 mm or 100 mm. This last measurement, measured in the absence of the wheel, could vary by a few millimetres (+/- 3 mm) depending on the internal tensions of the fork casting.

Civi 3Axis is designed for bicycles up to 30 kg equipped with a front through axle with a diameter of 15 mm and an internal fork opening for the wheel hub of 110 mm or 100 mm. The QR (Quick Release) systems and the Cannondale Lefty model forks are definitely excluded at the moment.

SIZES AVAILABLE	ALLOWED MEASURES
A - \varnothing 15x110 mm	\varnothing 15x107 mm / \varnothing 15x108 mm / \varnothing 15x109 mm / \varnothing 15x110 mm / \varnothing 15x111 mm / \varnothing 15x112 mm / \varnothing 15x113 mm
B - \varnothing 15x100 mm	\varnothing 15x97 mm / \varnothing 15x98 mm / \varnothing 15x99 mm / \varnothing 15x100 mm / \varnothing 15x101 mm / \varnothing 15x102 mm / \varnothing 15x103 mm

2. BAR LENGTH AND ALLOWED FRAME SIZES

The support is suitable for all frame sizes, from Small to Extra Large

The rear part of the bike is placed in the support seat. This component slides longitudinally accommodating the wheel in a section that can vary from 1.8" to 3". The installation is completed by fastening a certified belt.

Civi Solution is available to welcome and satisfy the personal requests of each customer

In order to submit the application it is necessary to write an email with the details of the need to the address info@civisolution.com.
